

The F-16 is always one of the highlights of the evening show. As ever Tom 'Gizmo' de Moortel's display is one of the very best fast jet display in Europe. However, the dark, clear skies meant that the flames from the aircraft's reheat were much more prominent and the flares left huge trails of sparks and smokes as they were released from their dispensers!

The final quartet of acts were all specialist twilight pyrotechnic displays. First to displays was the **Skydance Glider Display Team** from Germany. They fly the **Marganski S-Swift** glider, the world's most successful single seat aerobatic glider. For the evening performance Lars Lehmann flew a very elegant routine with wingtip and under-fuselage mounted sparking waterfalls and a stream of starburst effects.
